Welcome to the land of 10,000 lakes, home of the Minnesota Landscape Arboretum, recently named the #1 botanical garden in the nation by USA Today Reader' Choice Award and 40 years of Master Gardener volunteers cultivating our community.

The 2018 Upper Midwest Regional Master Gardener Conference will highlight the intersection of food, pollinators, water and growing plants. Enhance your horticulture knowledge, engage in exclusive workshops, network with your peers, and explore the ways you can use horticulture to make a difference in our environment to create a healthy planet, through healthy plants, for healthy people.
